

To whom it may concern,

In a classroom of talented students, Britnee Blake is in a class by herself. Her creativity, vision and passion make up the DNA of storytelling through film. Britnee's command of the camera brings beautiful, provocative, emotional and enlightening images to the screen. Her ability to invoke laughter, through her Junior class video "Secret Admirer" or educating the audience with her Sophomore film "Dark Room" are just some of the talents that will get better with age. It should be noted that Britnee is highly sought after by many teachers at Blake High School. She is considered by many to be the "go-to" student when something of importance needs to get done on-time and on budget. I have relied on her to be the point person on several major projects and I know that at least two other teachers have leaned on her to see passion projects through from beginning to end. Her professionalism, organization, social awareness and pure drive are some of the qualities that separate her from the rest of the students here in this Magnet School for the Arts.

Britnee will go on to make wonderful films and my hope for her is that many more people will enjoy them as much as I have.
